opsira Anniversary 2024:
25 years Partner for
Perfect Light

opsira GmbH celebrates its 25th anniversary in April 2024

Weingarten, 28 April 2024 - opsira GmbH is celebrating its 25th anniversary in April 2024 to mark its successful work in the field of lighting technology.

opsira has been supporting its customers in optical system technology for over 25 years, from the concept to the prototype. Modern optical design, measurements in the opsira light laboratories or customized measurement systems for use on the customer's premises: opsira offers everything from a single source.

opsira develops and optimizes optical systems using the most modern and efficient simulation and measurement technology. The goal is a successful product on the market.

opsira offers customized optical measurement and test systems, high-tech photo-, spectro- and goniophotometry products for sale to customers' own measurement laboratories. These measurement and test systems are built according to customer specifications and based on the many years of experience of the opsira team.

The robogonio goniophotometer combines near-field, extremely fast far-field and spectral measurements in a highly flexible system.

In the opsira light measurement laboratories, robogonio is used to measure optical systems precisely, quickly and cost-effectively.

Press contact

Uta Vocke, opsira GmbH, Leibnizstrasse 20, 88250 Weingarten / Germany,

opsira

The optics design expert has been operating successfully in the market for over 25 years. Starting as engineering service provider, opsira established as full-service provider including the design of optical systems, the development of customized optical measurement systems as well as high-tech products in the fields of photometry, spectrometry and goniometry. opsira's in-house lightlabs measure optical characteristics of products and components to ensure high quality of luminaires and light sources. The company has about 20 employees and focuses on general lighting, automotive, signal and medical lighting.
