opsira welcomes distributors for further countries: France, Japan, Canada, and USA

Weingarten, June 2022

opsira GmbH

The optics design expert has been operating successfully in the market for over 20 years. Starting as engineering service provider, opsira established as full-service provider including the design of optical systems, the development of customized optical measurement systems as well as high-tech products in the fields of photometry, spectrometry and goniometry. opsira's in-house lightlabs measure optical characteristics of products and components to ensure high quality of luminaires and light sources. The company has about 20 employees and focuses on general lighting, automotive, signal and medical lighting.

opsira provides engineering services and measurement systems all over the world and is supported by distributors in China, India, South Korea, Taiwan, Malaysia, Thailand, Vietnam, and Singapore
